

Peramanthan Sathyamoorthy

Curriculum Vitae

Summary

✉ : [in](#) [G](#) [X](#)

Senior Software Engineer and naturalized **Swedish** citizen of **Indian** origin with over *9 years* of experience in *building* scalable web applications and *leading* development teams. Holds **Master's degrees** in **Computer Science** and **Operations Research**, providing a strong foundation in both theoretical and applied aspects of technology and optimization. Proven expertise in **JavaScript**, **TypeScript**, **React.js**. Demonstrated leadership in integrating innovative solutions and driving efficiency in startup environments. Experienced educator with a passion for mentoring and fostering innovation through technology.

Recent Relevant Recorded Experiences

- Jan 2023 - Present **Senior Software Engineer (24 months)**, *Oneflow AB, Digital Signature and Contract Management Platform*, Stockholm 🇸🇪
- **Strategically integrated TypeScript** into a mixed legacy codebase with FlowType and JavaScript, resulting in a 70% reduction in type-related errors, significantly enhancing code reliability and maintainability. Leveraged previously introduced zod's type inference for robust type hinting in business data.
 - **Automated the conversion of JavaScript** modules to TypeScript with a custom script preserving version control history, saving over 200+ hours of manual work, accelerating development timelines.
 - **Unified distributed ACL permissions** into a single utility module, managing complex contexts and user roles (owner, guest) to simplify maintenance, migration and enhance scalability.
- Oct 2021 - Dec 2022 **Engineering Team Lead (15 months)**, *Oneflow AB*, Stockholm 🇸🇪
- **Co-led the development of a new JSON-based rich text editor** seamlessly integrating with legacy HTML, increasing user satisfaction by 60% and providing a modern, cohesive editing experience.
 - **Mentored and empowered the development team** to a self-organizing model, overseeing hiring and onboarding while instilling a continuous improvement culture. This resulted in increased productivity, stronger ownership, and scalable team practices.
 - **Pioneered an end-to-end testing transformation** with Playwright, starting with an innovative approach to replicate mob testing scenarios. This significantly reduced regressions and boosted efficiency. Later, I spearheaded a complete rewrite of the end-to-end testing suite in Playwright.
 - **Engineered a lightweight Zod-based data validation library** which streamlined data validation and minimized runtime errors.
- Mar 2019 - Sep 2021 **Full Stack Integration Engineer (31 months)**, *Oneflow AB*, Stockholm 🇸🇪
- **Established the Integration Team** from the ground up, creating foundational processes and best practices for long-term scalability, while strategically aligning integration solutions with business needs.
 - **Designed multi-client applications** with Python and React.js, facilitating seamless integrations with platforms like HubSpot and SuperOffice, expanding Oneflow's reach and interoperability.
 - **Stabilized and enhanced the Public API**, which enabled a robust third-party integration ecosystem, contributing to client satisfaction and platform versatility.
- Apr 2017 - Feb 2019 **JavaScript Developer(23 months)**, *Oneflow AB*, Stockholm 🇸🇪
- **Innovatively Integrated React Router into a Backbone.js-based client** to build Identity and Access Management, facilitate faster prototyping cross-linked user management and efficient testing.
 - **Optimized CI build processes**, reducing build times by 40%,
 - **Contributed to modernizing the legacy codebase** by transitioning to React.js.

Stockholm, Sweden

Jan 2016 - Mar 2017 **Full Stack Developer**, *Weavler AB*, *An accessible e-commerce platform for artisans with 1.6M SEK PTS grant 2015*, Stockholm 🇸🇪

- **Managed AWS cloud infrastructure**, reducing operational costs by 40%.
- **Administered MongoDB databases**, ensuring high availability and performance.
- **Integrated services** like Mandrill, Slack bots and PayPal, enhancing platform functionality.
- **Created an intelligent notification and chat bot** for onboarding and FAQs.
- **Implemented SEO strategies** with server-side rendering.
- **Developed a open source babel plugin** to quickly implement translations to the entire project.
- **Enhanced accessibility** with text customization and color filters, aligning with WCAG standards.
- **Experimented advanced features** like speech synthesis and recognition, improving accessibility.
- **Designed responsive** email templates for email clients and browsers.
